We are committed to working with you to provide the best care for your patients.

DEAR COLLEAGUES,

Our NCI-designated comprehensive cancer center team will review your patient’s case and assist you with prevention, diagnosis and treatment for gynecologic cancers that range from common to the most complex cases. Our team will see your patients quickly and work with you to create an individualized treatment plan.

We look forward to collaborating with you!

Diane Yamada, MD
Professor of Obstetrics/Gynecology
Chief, Section of Gynecologic Oncology

ENSURING THE BEST CARE

» We will see your patients quickly and collaborate with you to create an individualized treatment plan.

» Our nationally recognized experts, including our NCI-designated comprehensive cancer center team, can review your patient’s case and assist you with detection, diagnosis and treatment for gynecologic cancers that range from common to the most complex cases.

» We offer the largest number of clinical trials involving innovative treatments of gynecologic cancer.

» Our team has expertise with intraperitoneal chemotherapy for advanced-stage ovarian cancer.

» We are a lead site for the Gynecologic Oncology Group (GOG), a cooperative clinical trials group that is responsible for more gynecologic cancer research than any other research group in the United States.

» Your patients will have access to our nationally and internationally known team of specialists who meet weekly to share information and insights, leading to the most effective and often groundbreaking treatments for each patient.

WE OFFER YOUR PATIENTS

» Individualized care provided by a multidisciplinary team that includes experts in gynecologic oncology, medical oncology, nursing, pathology, radiology, radiation oncology, social work, surgery and psycho-oncology.

» The highest quality, most advanced, compassionate care for women with ovarian, uterine, cervical, vulvar and vaginal cancers.

» Easy access to the most advanced diagnostics and treatments available for gynecologic cancers.

» Tailored treatments to optimize surgical outcomes, including minimally invasive, fertility-sparing and robotic surgery.

» Access to the University of Chicago’s Program in Integrative Sexual Medicine (PRISM), which has been designed to identify, prevent and treat sexual problems for female cancer patients.

» Supportive programs for patients and families, including genetic testing for gynecologic cancer at the Cancer Risk Clinic, cancer support groups, preventive screenings and a comprehensive cancer resource center.
